Nice initiative

Hands on training might also help as Phase 2 excerise for selected participants

May elaborate TRL aspect of products which is crucial parameter for acceptance of proposal.

Speed of Delivery and Presentation could be slower

Good

Very fruitful discussion regarding startup grant writing

Can the slides of today's presentation or relevant reference material can be shared?

Helpfull discussion

Thank you VC and Team for the same

I guess it will be suitable to reduce the content/scope of the topic and add more example based description.

TechEx.in can consider giving the speaker some topics to cover in advance. This will ensure that we can share topics that our audience may wish to hear about.

Very informative session

Thanks to VC

Very informative session

Excellent Session. Appreciate the information put together by the speaker. Covered a lot in a short time.

1) Please invite Madhuriji for SEO marketing 2) Marketing in Healthcare and biotech space

Informative and satisfactory content

This subject is so vast that specific case studies will be useful to understand each platform better

Good session

Love to attend more sessions on digital marketing

Please add SEO as part of this presentation.
Added negotiations as a skill to learn. More case studies would be helpful from start up point of views
Talk was very informative
Would like to be part of many such sessions
How educational institutes benefit being using Opensource software for their research purpose with knowing the consequence?
The talk has very good information and insights on Open Source software. I think the Venture center team could have also requested Hasit to talk about other kinds of IP as well for completeness. We should have a separate session on Creative Commons License. We should have special session on IP rights which Global Charities prefer.
Make it more practical with real life cases and examples
Very important aspect of business ventures has been discussed
Very informative session
Very nice content. Explained very well. Definitely worth doing a full workshop. One full case study will be nice to read and interpret and understand implications --- in workshop.
Can be more specific
Getting deeper into few contracts/conflicts/case studies will be add-on
Very important and fruitful session
Thank you for the wonderful session. Still lot more to learn with respect to negotiations, arbitration and IP clauses. Layout for pure research collaborations and research collaborations with financial implications.

Technical terms for patent applications.				
Just that the volume was quite low when the talk started.				
Well done. It came our well. We need to ensure that many more people benefit from it.				
I have a hearing loss. Hence, request you to keep the subtitles / captions always ON for future sessions. I did manage it using the Google Translate app but it is not very accurate. Thanks

Very Important Session					
Discuss case studies in every topic. This is what all innovators and entrepreneurs want. Pick examples from 10 years ago and specifically talk on technology, cost, licensing etc. with numbers. Everyone gives generic innovation jargons which eventually helps none. The speakers have this specific content ready, unless VC teams asks, they are gonna use jargons and ppts. Only case studies please
